THIS JUST IN!

The upcoming "SONIC ADVENTURE" storyline on sale late November through late January isn't just a story or hype that is taking a multiple issue of SONIC THE HEDGEHOG and one all-page SONIC SUPER SPECIAL to tell it all. That, my friends, is the official game adaptation to "SONIC ADVENTURE." This game can only be played on one new system: SEGA's DREAMCAST — "the ultimate gaming machine" — subjecting us to it!

This high-speed thrill ride into Sonic land is a fantastic new 3-D adventure at sports of up to six characters at once! With breathtaking graphics, six playable characters, full 360 degree movement in expansive 3-D worlds (just even "total-gamer" to discover), "SONIC ADVENTURE" shows gamers the future of video game play, using the power of SEGA Dreamcast. Producer Yuji Naka and his Sonic team are taking Sonic and his friends to a new level. Gamers can now play as one of any six characters including Sonic, Tails, Knuckles, and Amy Rose, or new characters, Big the Cat and E-102. These characters can now climb, fly, hover, swim, and for the first time, talk — whatever it takes to stop their nemesis, Dr. Robotnik. Check out the game, it's definitely worth your hard-earned cash!

Catch up on the flip side!

A black and white comic book illustration. In the center, a duck with a large, rounded head and a small tuft of feathers on its head is sitting in a nest. The nest is made of sticks and twigs, with some leaves visible. The duck is looking towards the viewer with a slight smile. In the background, there are large, dark, rocky cliffs. A large, bright sun or moon is in the upper right corner. Several birds are flying in the sky above the cliffs. The overall style is reminiscent of classic comic book art.
